Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5-8, 10-13, 15-19 and 20-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Murdock et al. (2003/0182632).

As to claim 1, Murdock teaches a system and a method for remote software products localization (Fig.1), comprising the steps of:

Loading the initial language at localization server for the purpose of localizing languages up on requests;

Checking by the remote device whether the selected text are loaded in the language database/map/memory at the localization server (Fig.1; par.0031)

Identifying the language and localizing the initial language at the localization server and communicating the localized text to the remote localization enabled device; and

At the user interface rendering the localized language (Fig.1-2).

according to Murdock the method for providing remote localization comprises "Establishing a localization server <u>loaded</u> with text string information includes <u>loading</u> the localization server with text strings in a plurality of languages and character sets. Application/Control Number: 10/681,451

Art Unit: 2626

Then, selecting a first set of text string information includes selecting a text string language and character set. (Par.0018).

As to claims 2-3 Murdock teaches a communication between the user terminal, RLE and the localization server for executing the process (Fig.3; Par.0031).

As to claim 5, its inherent that the original language is neutral in Murdock.

Claims 6-8, 10-13, 15-19 and 20-24 are analogous to the claims above and are rejected for the foregoing reasons by Murdock.

Allowable Subject Matter

Claims 4, 9, 14 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: these claims are allowable because Murdock doesn't teach where the database comprises placeholders as recited in the claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel D. Abebe whose telephone number is 571-272-7615. The examiner can normally be reached on monday-friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Hudspeth can be reached on 571-272-7843. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
